## **DETAILED ACTION**

#### **Drawings**

1. Figure 24 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### Specification

2. The disclosure is objected to because the title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

## Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1, 4, 5, 8, 9, 12, 13, 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Garr et al (US 5,341,166).

#### Claim 1:

Garr discloses:

Art Unit: 2614

"receiving means (Fig. 2 item 26) for receiving a remote control signal transmitted from a remote controller (Fig. 2 item 28);

"judgment means (Fig. 2 items 28, 26) judging an external equipment (Fig. 2 item 16 for instance) corresponding to the remote control signal"; and

"transmitting means (see the transmitting means which links items 26 and 16 for instance) for transmitting control data corresponding to the remote control signal to the external equipment judged".

Claim 4 is disclosed, see Fig. 2 item 20.

#### Claim 5:

#### Garr discloses:

"selection means for selecting an external equipment", see Fig. 2 items 28, 26, col. 7 lines 56-58;

"receiving means (Fig. 2 item 26) for receiving a remote control signal transmitted from a remote controller (Fig. 2 item 28);

"transmitting means (see the transmitting means which links items 26 and 16 for instance) for transmitting control data corresponding to the remote control signal to the external equipment selected".

Claim 8 is rejected for the same reasons as claim 4.

Claim 9 is rejected for the same reasons as claim 1.

Claim 12 is rejected for the same reasons as claim 4.

Claim 13 is rejected for the same reasons as claim 5.

Claim 16 is rejected for the same reasons as claim 4.

Art Unit: 2614

#### Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 2, 3, 6, 7, 10, 11, 14, 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Garr et al (US 5,341,166) in view of Osakabe (US 6,400,280).

Garr does not explicitly say that the transmitting means is a digital interface based on the IEEE 1394-1995 standard as claimed in claim 2. However, transmitting means based on the IEEE 1394 interface is very well known in the art (as evidence see Osakabe at Fig. 3 and col. 5 lines 1-11) as a means of providing high-speed interconnection between devices and low-cost implementation. Thus, Garr in view of Osakabe would have rendered the claimed invention obvious; an artisan would be motivated to combine the references to arrive at the claimed invention; and this combination would result in low-cost implementation and high-speed interconnection. Therefore, the claimed invention would have been obvious to a person of ordinary skill in the art at the time the invention was made.

Claim 3 is disclosed in view of the above combination, see Osakabe at Fig. 3 item 23. Claims 6, 7 are rejected for the same reasons as claims 2, 3.

Claims 10, 11 are rejected for the same reasons as claims 2, 3.

Claims 14, 15 are rejected for the same reasons as claims 2, 3.

Art Unit: 2614

#### Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to *Jean W. Désir* whose telephone number is (703) 308-9571.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, *John W. Miller*, can be reached at (703) 305-4795.

8. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

(703) 872-9314 (for Technology Center 2600 only)

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington, VA, Sixth Floor (Receptionist).

9. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technology Center 2600 Customer Service Office whose telephone number is (703) 306-0377.
